

HEATING CENTER

BIG SAVINGS, SMALL FOOTPRINT

Our Heating Center is a cost-effective way to add the benefits of waste oil heating to just about any facility.

Consisting of an oil storage tank, funnel, pump bracket and a steel mount that can accommodate any Clean Energy furnace, the Heating Center packs clean heat and fast ROI into a small footprint. Perfect for shops, garages and facilities of all sizes, it's the easiest way to start saving money today.

INNOVATIVE FEATURES:

- » Easily mount a furnace just about anywhere
- » No need to snake oil lines long distances
- » Self-contained oil tank and stand
- » Large 250-gallon tank
